

ENVIRONMENTAL POLICY

The company "Nera Pigon Grammou S.A." that operates in the Natural Mineral Water Bottling sector, recognizes its responsibility towards the environment, and it is committed to the continuous improvement of its environmental performance.

Its goal is to protect the environment and sustainable development through responsible practices throughout its operation.

In this context, the company is committed to:

- ensuring the quality and quantity of natural mineral water through rational and sustainable management of water resources.
- complying with all legal and other requirements regarding environmental protection in all its activities and assessing the degree of its compliance at regular intervals.
- setting measurable environmental goals, which it reviews and adjusts annually in the Management Review.
- monitoring and seeking to continuously reduce the consumption of natural resources (water, energy, raw materials) in the most efficient and technically feasible way.
- cooperating with national and local bodies responsible for environmental protection
- using recycled PET (rPET) in the production process at a rate of 30%.
- implementing a documented weight balance calculation system to monitor the amount of recycled PET material used in the production process.
- selecting exclusively certified rPET suppliers
- ensuring that staff are aware of their responsibilities, train them and encourage them to implement environmentally friendly practices
- seeking continuous environmental compliance and improvement,
- communicating its policy to employees, business partners and other interested parties.
